Burlington to Ask That State Funds Be Given by Number of Children

CITES DRAFT ALLOTMENT

Burlington, N. J., Dec. 22. — Declaring that when the State called for troops for national service during the World War the county apportionment was made on manhood and not ratables, but that in the apportionment of school moners the State has reversed the rule moners the State has reversed the rule moners are founding on necumulated wealth and the state has reversed to the rule moners are founding on necumulated wealth and the state has reversed to the rule moners are founding of a trunk in New York in July, 1920, containing a moners the State has reversed the rule moners are founding on necumulated wealth and the state of the rule moners are founding of a trunk in New York in July, 1920, containing a moner of bodies of American soldiers, well the trunk murder mestary that was the dead are being returned to South American are found to the rule of the rule o and is figuring on accumulated wealth and not on children, Vann H. Smith, supervising principal of the Burlington public schools, in an address before the Kiwanis Club, gave Burlington County its battle slegan in the fight for a more equitable share of school funds.

"Give us educational aid as we gave you military aid," is the plea the coun-

ty will make to the next Legislature in seeking a law that will enable the county to educate its children and yet escape from the burden of school taxes laboring. The Kleanis Club has launched the campaign here and will seek the co-operation of every school district in the county in presenting the issue before law-makers in Trenton

when the new Legislature convenes.

In his argument for the clange in the method of apportionment, the supervising printput condemned the preven system as the most undemocratic ever eystem as the most undemocratic ever evolved, in that it works to the advantage of the county with a wealth of property and populizing the county with a wealth of children.

As an example, he showed that the taxable wealth per child in Burlington County is only \$282 as against \$7987 for Cape May, and this proportional.

difference exists in the returns under the county for school purposes. In the allotment of railroad taxes the difference far exceeds the variance in population. Busington County getting only \$37,318, as compared with \$664,840.

the share of Essex County. For every

dollar given by the State, it was shown, Burlington County has to give \$5.22, while Hudson County has to raise only \$2.54. Atlantic \$2.37 and Cape May \$1.88. Principal Smith demonstrated that.

Principal Smith demonstrated that, while the cost of educating a pupil in Atlantic County is \$62.02, there is a county school tax of only sixty cents, in Burlington County, on the other hand, the cost of educating a pupil amounts to only \$34.19, but, because of the lack of an equitable share a Should the apportionment be made on an equitable distribution among all children of the State, figured on attendance records, Burlington County, Mr. Smith chians, would receive \$205.

# "Peace on Earth—Good Will to 11

What a glorious time of the year is the joyous Christmas season, when happiness predominates, when all hearts are united on a common level of love and good will to one's fellowman. Truly it is more blessed to give than to receive.

What a blessed day it was, when, in a manger in Bethlehem, many centuries ago, was born the little Babe who was destined to give to the world the most sublime demonstration of love and self-sacrifice it has ever known. Let the giory of His love be reflected in our practice of His teachings.
